- * Cost effective
- * Easy to fit

Description

As you can see from the before and after photos, this product will transform the frontage of any house to get an authentic finish, this product is moulded from real rosemary tiles.

Between bay tile cladding is moulded in a one piece unit, hence very easy to fit, and even with kids throwing small stone chippings it will not fall apart unlike traditional tiles.

The product is pre-coloured hence no need to paint and is maintenance free and will not rot.

The manufacturing process entails making a new mould so this product is only cost effective on 8 units and over to cover the tooling cost.

Any size available
this product is made to order
