

Door Canopy Measuring Instructions

- A Measure from one side of the door/window frame to the other side of the frame.
- B If Decorative Legs are required, add another 400mm for a pair of Decorative Legs.
- C Add another 200 – 400mm overhang dependent on the size of the opening.
- D Add A, B & C to determine an approximate width for your canopy.
- E Choose a Canopy from the Overdoor Canopy Page which is a suitable size for your opening.
- F Check for any height restrictions, downpipes, lighting, overflow pipes, vents or any steps in the brick work which could be an obstacle when fitting a canopy.
- G Check all dimensions from the Canopy Specification sheets against your Dimensions and obstacles, you can now place an order.
- H If you are unsure that the Canopy you are interested in will fit or cover a scar, please email some digital Photos together with the Dimensions and we will double check and make recommendations.
